

(Launching of the) Philippine Health Research Registry

Ms. Merlita M. Opena

Chief, Research Information, Communication and Utilization Division

PCHRD

Now, live... Philippine Health Research Registry

**It is a research governance and management tool, to know who's doing what, where, level of investment, rate of adoption by target beneficiaries.**

<http://registry.healthresearch.ph>

- Built on the development of clinical trials registry, extended to cover all health researches.
- A publicly accessible database built and sustained by researchers; for prospective approved researches; will go back to research approved last year (transition)
  - Quality assurance by PCHRD
  - Compliant with the World Health Organization (WHO) standard for clinical trials registry
  - Uses an opensource software "Joomla" which follows the industry standards in creating a content management system.

<http://>

- Initial content. PCHRD-funded researches, RITM, Medical City through the help of Dr. Emil Aligui and Dr. Toby D ayrit.

Limited version features

- Encoding/updating by researcher, registration by Registry Officer @PCHRD
- Keyword Search, display options similar to clinicaltrials.gov
- Embedded Help for those filling up the forms
- Email-based Notification (Registration, Submission, Approval, )
- GUIDE for researchers, RDIs, HEIs to encourage compliance

Enhancements for PNHRS Launch in August 2012

- Advanced Search / Filtering
- Exporting (PDF, Text, XML, CSV)
- Aggregate Reporting
- Glossary
- Help Section (FAQs)
- Audit Trail

Philippine Health Research Registry is a work in progress
