

A Briefer on the Philippine eHealth Strategic Framework and Plan

Deliverables, 2016 & Beyond

DOH-DOST

Background

Information technology has become affordable and pervasive. Case in point: the mobile phone in your pocket

Yet, despite this, IT has not been effectively used in the health sector. There will be tremendous benefits if key healthcare processes can be computerized.

Background

In order to create an enabling environment for the use of IT in healthcare, DOH and DOST with the guidance of WHO, crafted the Philippine eHealth Strategic Framework and Plan (PeHSFP).

The PeHSFP is our roadmap to how we will use IT for healthcare in the country.

Brief History

DOH and DOST are jointly managing the Philippine eHealth Strategic Framework and Plan.

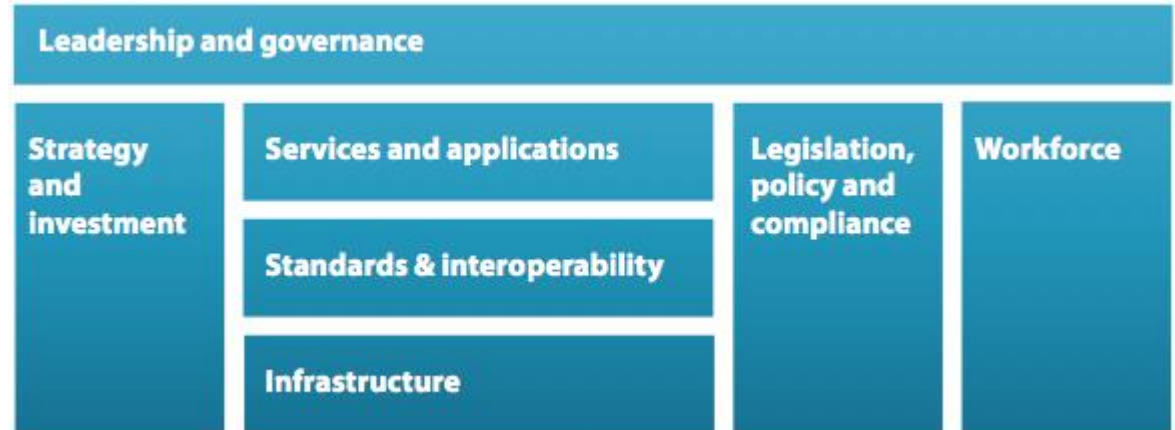

July 2013: a joint national eHealth governance structure was formed

Sept 2013: DOH and DOST participated in a writeshop on the WHO-ITU National eHealth Strategy Toolkit.
PeHSFP maps to the framework of the Toolkit.

WHO-ITU National eHealth Strategy Toolkit

Development Framework

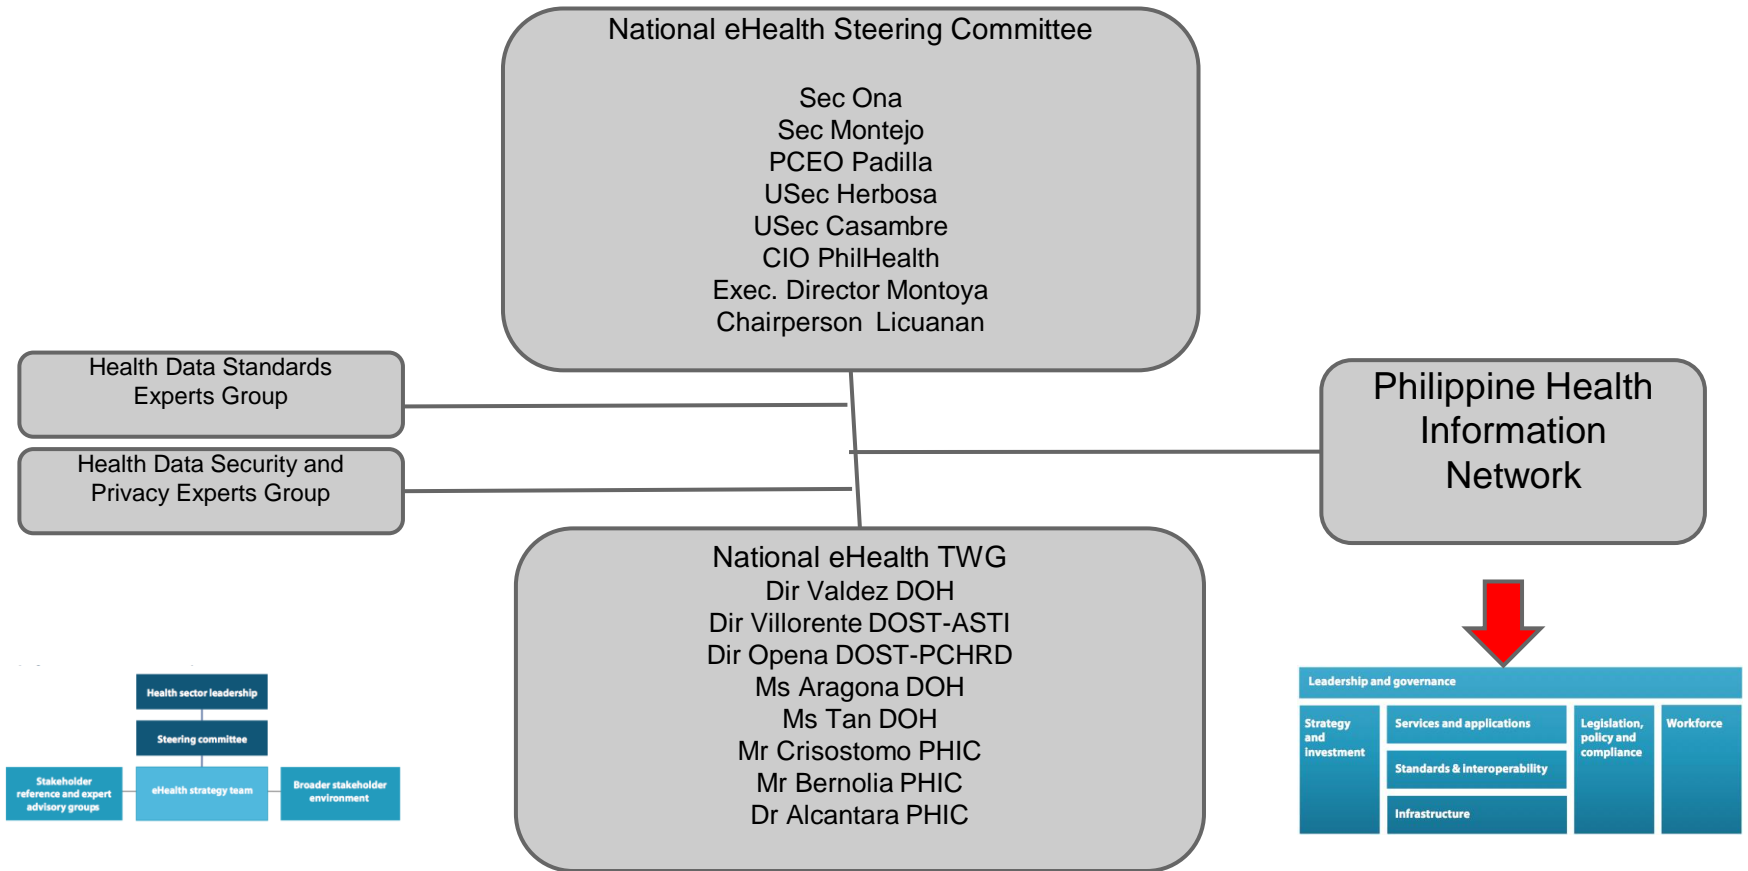

Leadership and Governance

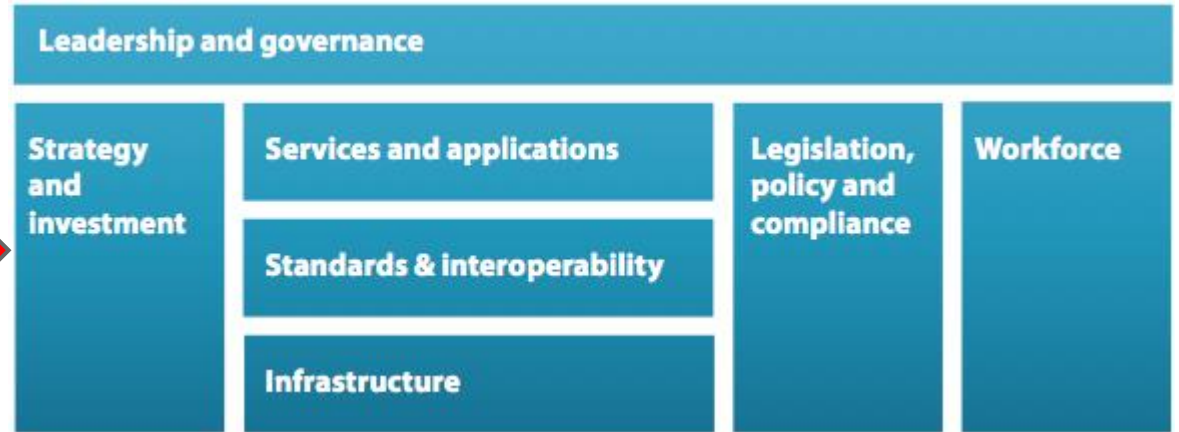

WHO-ITU Toolkit Recommendation

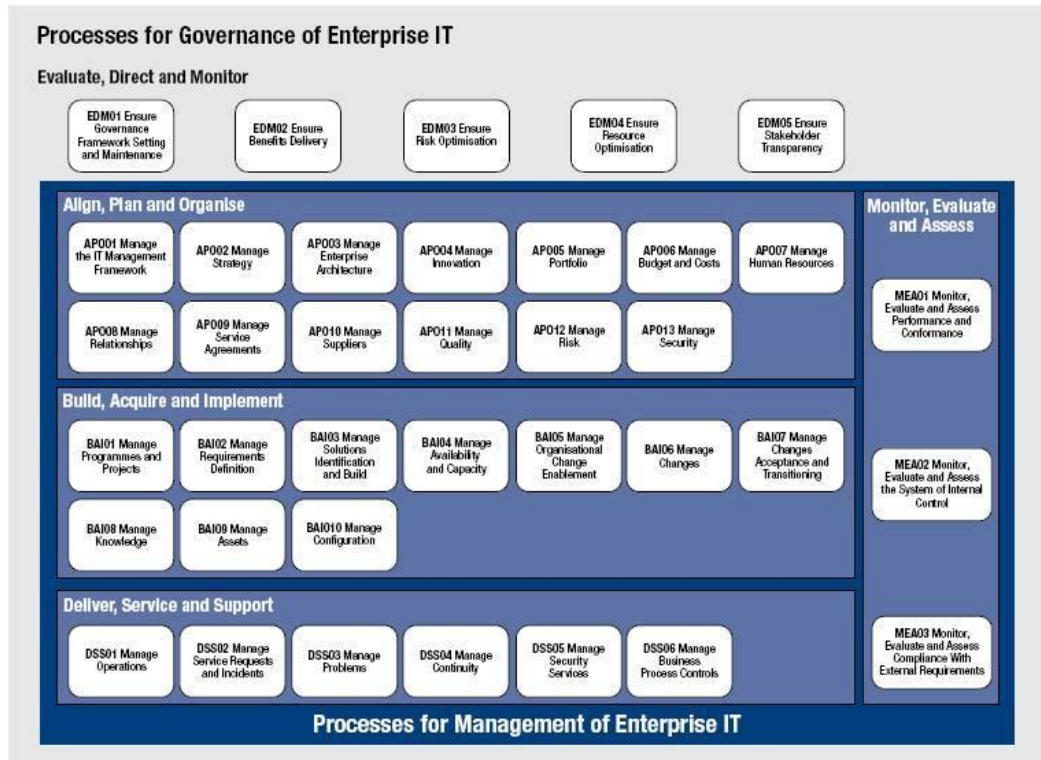

Leadership and Governance - DOH-DOST

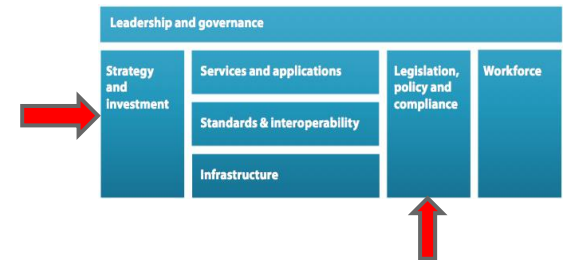

Strategy/Investment and Legislation, Policy and Compliance

Strategy/Investment and Legislation, Policy and Compliance - DOH-DOST

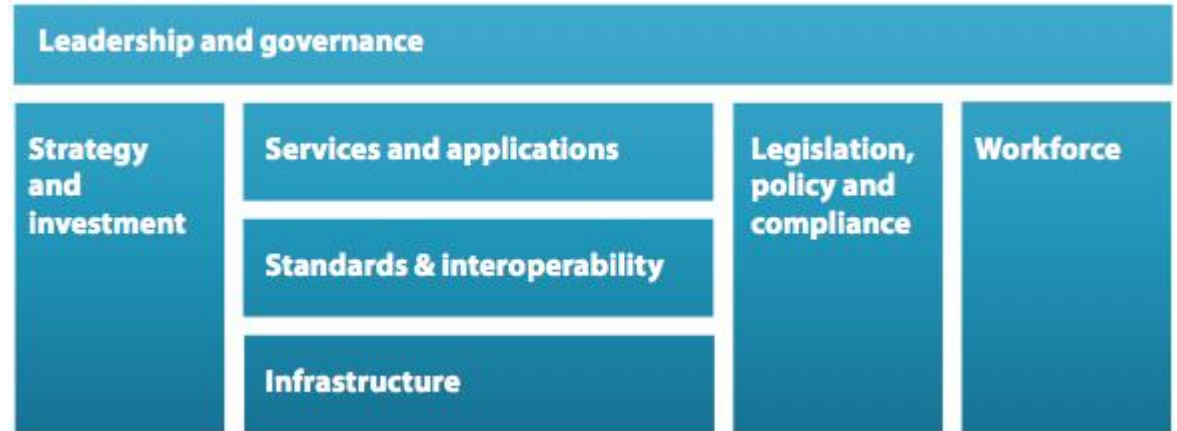

DOH will adopt an internationally-accepted IT Governance Framework.

Capacity-building for the Workforce

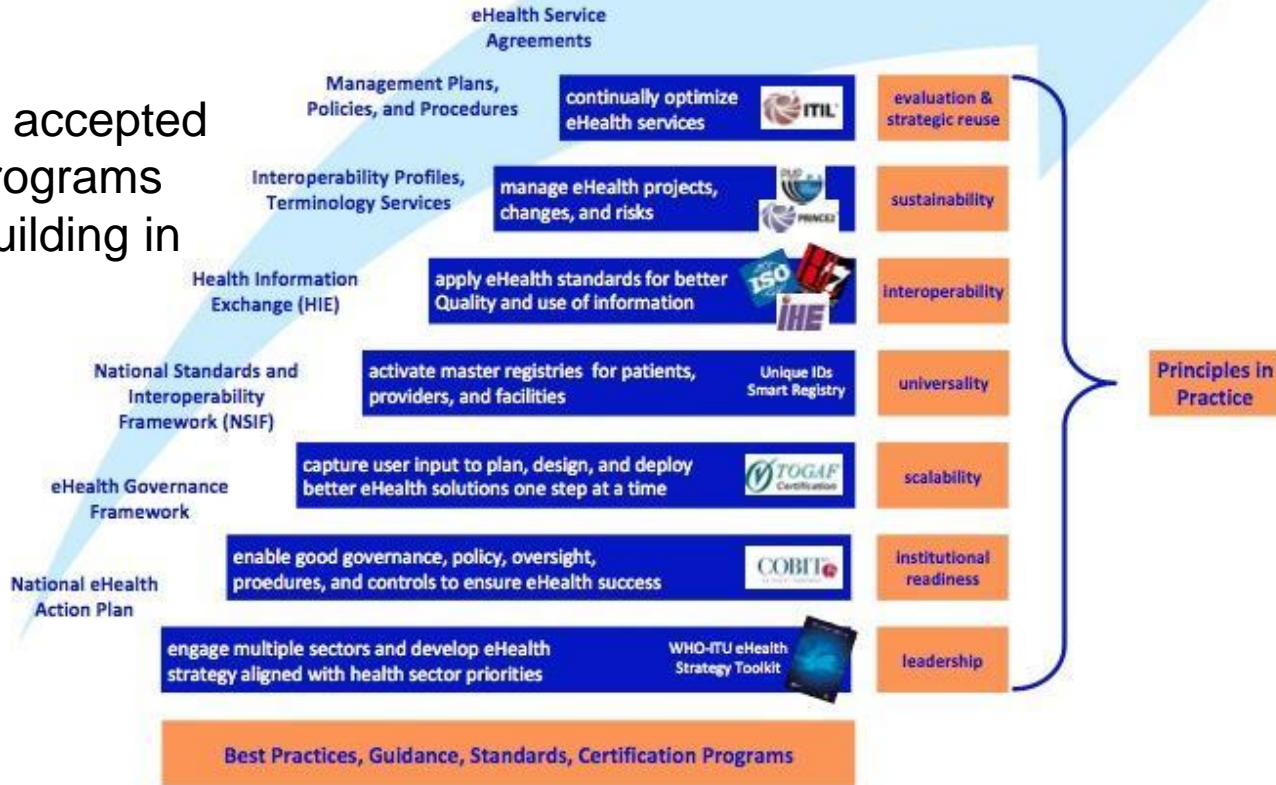

The IT Governance Framework clarifies the capacity-building roadmap for eHealth governance and management.

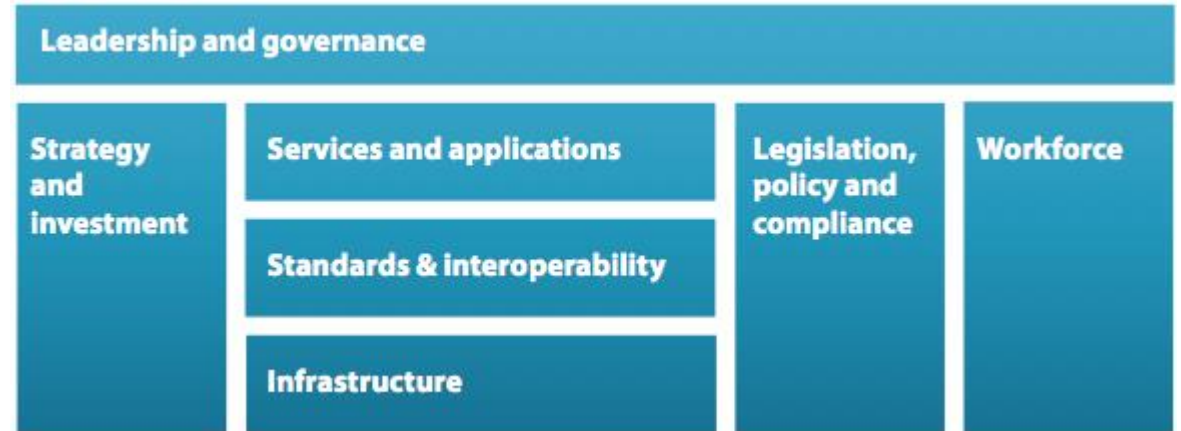

National eHealth Capacity Roadmap

DOH will adopt internationally accepted certification programs for capacity-building in eHealth.

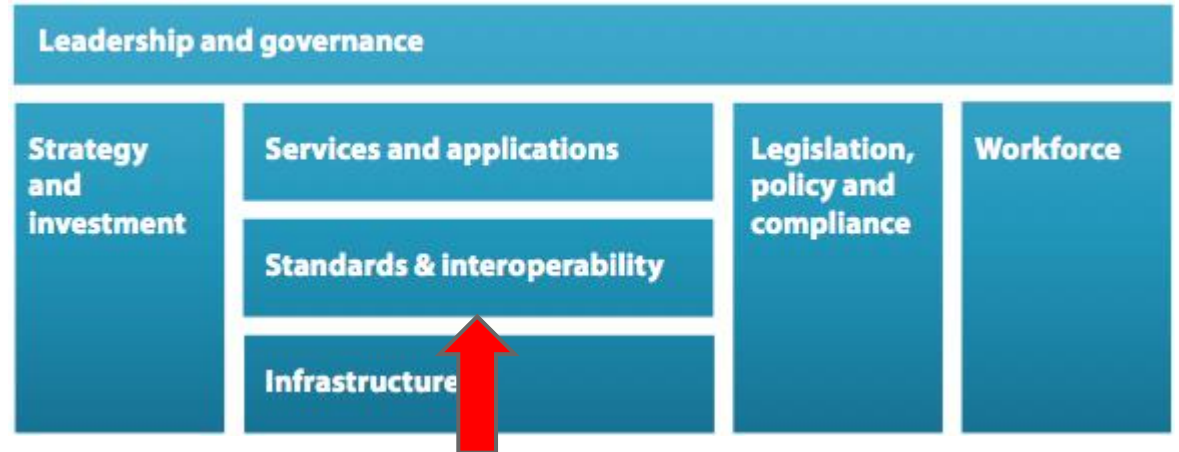

Infrastructure

on DOST's iGovPhil

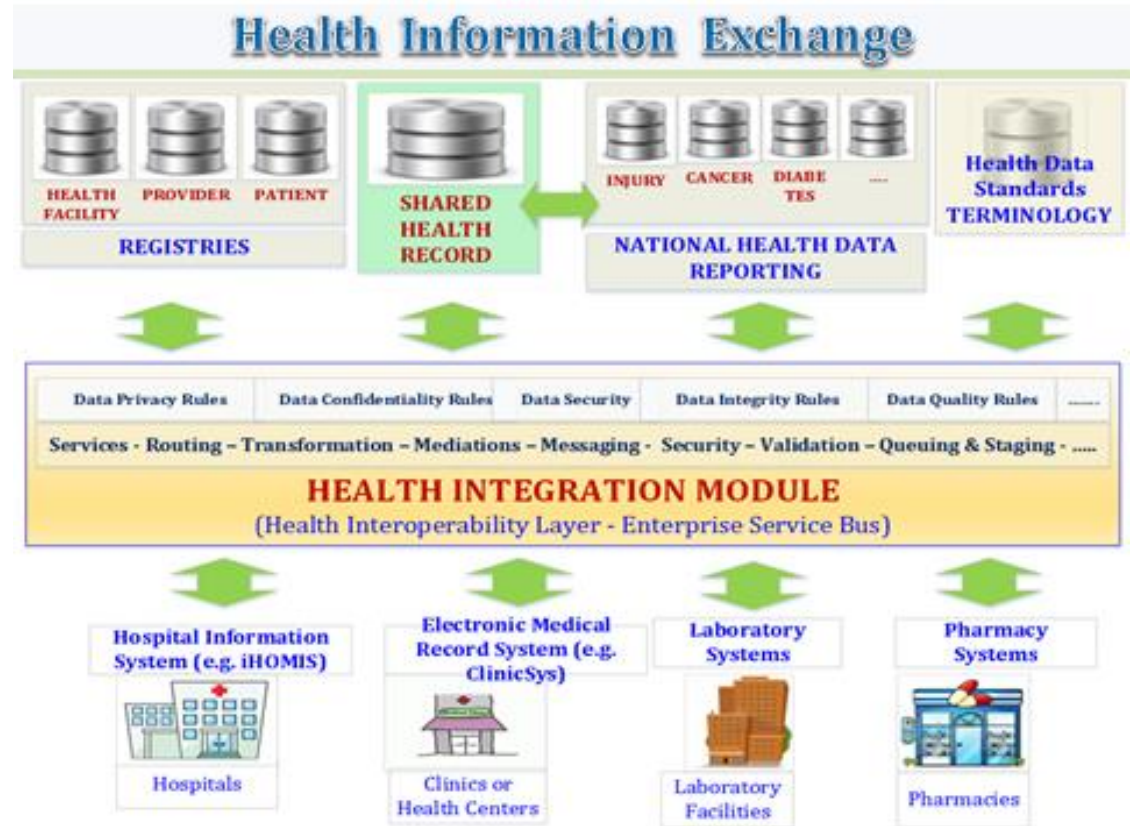

Standards and Interoperability

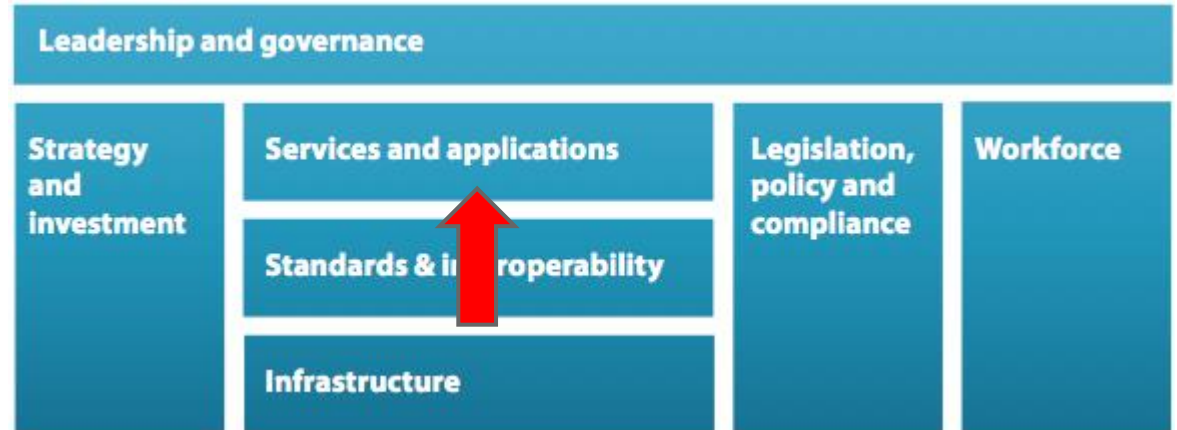

Standards and Interoperability - DOH-DOST

DOH and DOST (with support from MITHI) will build the Philippine Health Information Exchange.

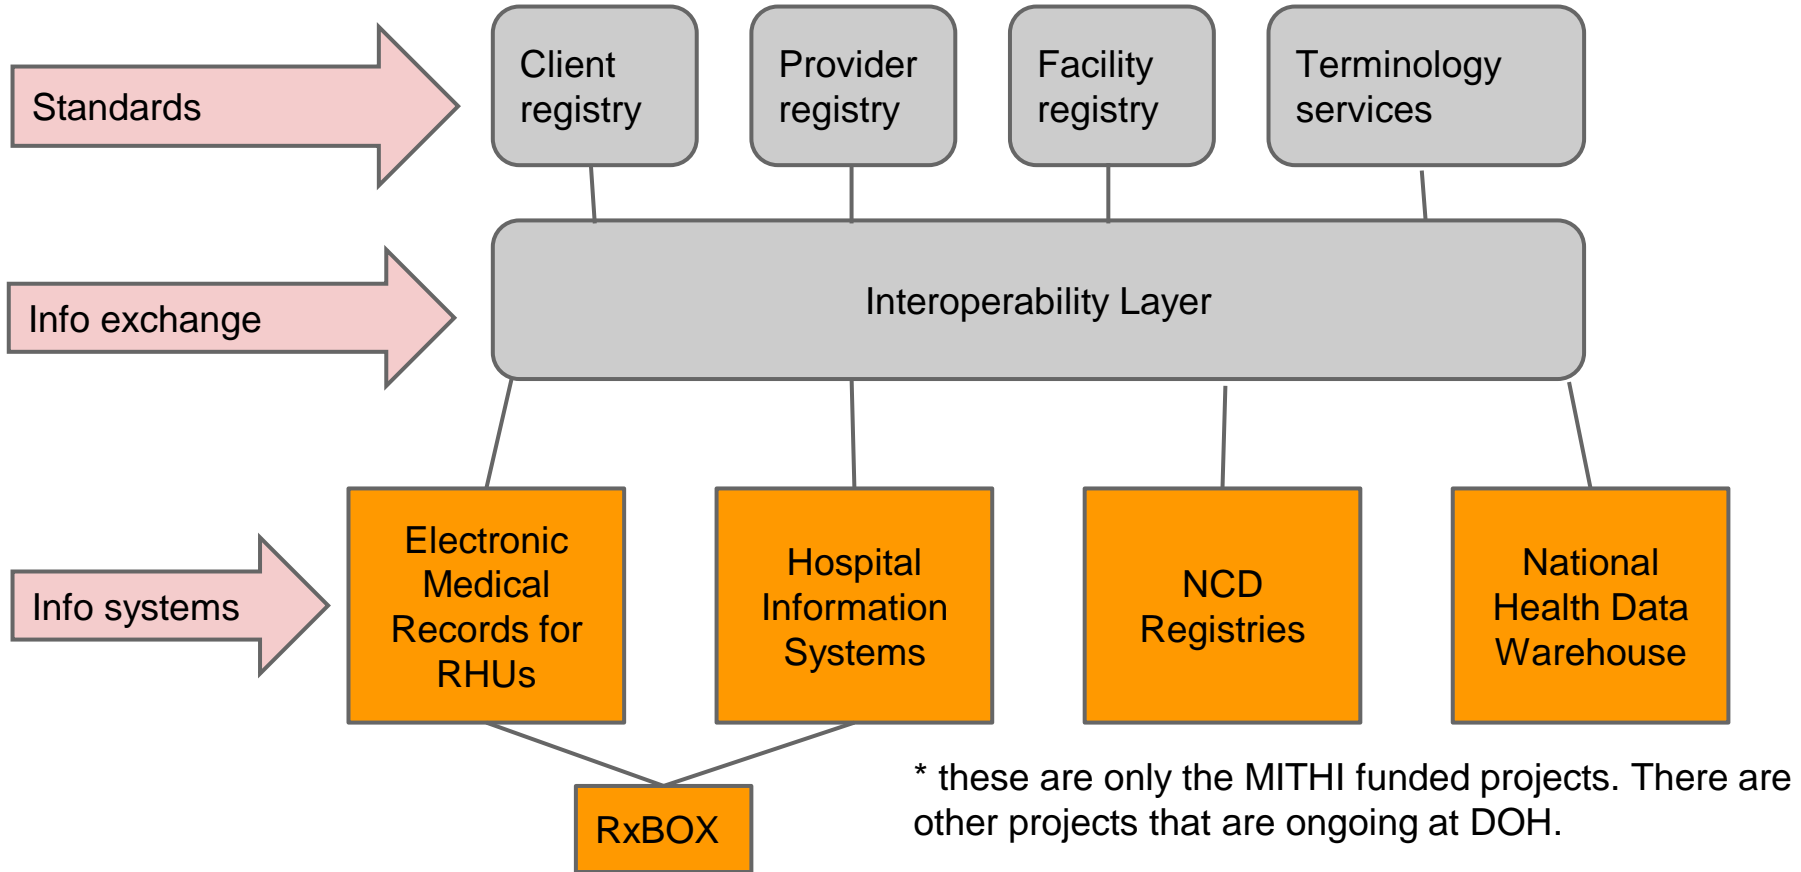

Services and Applications

MITHI will support the foundational eHealth systems in 2014- 2015.

Services and Applications DOH-DOST

Philippine Health Information Exchange

Next Steps

- Broader engagement of stakeholders through the Phil Health Information Network
- Inclusion of private sector and academe into eHealth governance
- Priority deployment of the client, provider, and facility registries (via the Phil Health Information Exchange)
- Fast track capacity-building following the eHealth roadmap
